## Technical Skills

- **Programming & Development:** HTML, CSS, JavaScript, SQL
- **Frameworks:** MVC 5, Bootstrap
- **Operating Systems:** Windows XP-10
- **Version Control:** Git, GitHub
- **Databases:** SQL Server
- **IDE:** Visual Studio 17/19
- **Methodologies:** Agile/Scrum, Azure DevOps
- **Software:** MS Office Suite, Jonas, POS/Client Management

## Business Skills

- Budgeting & Accounting Practices
- Stakeholder & Vendor Management
- Inventory & Bookkeeping
- Strategic Alignment & Planning
- Leadership & Team Development

## Programming Projects

- Used HTML, CSS, and Bootstrap 4 to build a sample movie theatre website.
- Used HTML and CSS to create a sample space station website.
- Used MS Azure, Visual Studio 16, and Entity Framework to implement a sample database instance for a fictional university.
- Used HTML, CSS, and JavaScript to build a portfolio website, a pizza ordering website, a tic-tac-toe game, a working calculator, and several other small, web-based applications

## Technical Professional Experience

*Software Developer Intern*, Prosper IT Consulting, Portland, OR, Sept. 2020
- Used Agile/Scrum Methodology for 2 week Sprint, worked on a large scale MVC web application. Worked with Azure DevOps, Google Meet, and Slack to organize and communicate with a nationwide team.
- Used Visual Studio 19 and Git version control to manage code.
- Problem-solved using HTML, CSS, and Bootstrap to complete User Stories addressing issues of layout, function, and styling.
    - Wrote HTML & CSS styling updates for over 50 separate files, providing a consistent look and behavior for all buttons on the website.
    - Updated the layout, spacing, and styling of the entire Archives page.
    - Worked with the team to troubleshoot issues and fine tune all updates. Went through multiple rounds of feedback & edits to achieve satisfactory results.
